Tutorials

- How to Register
- Customize Output Settings
- Start Desired Music App
- Add New Music Sites
- Record Settings
- Start Recording Songs
- Check Downloaded Songs
- More Tools

How to Register

Step 1: Launch AudiCable Audio Recorder on PC.

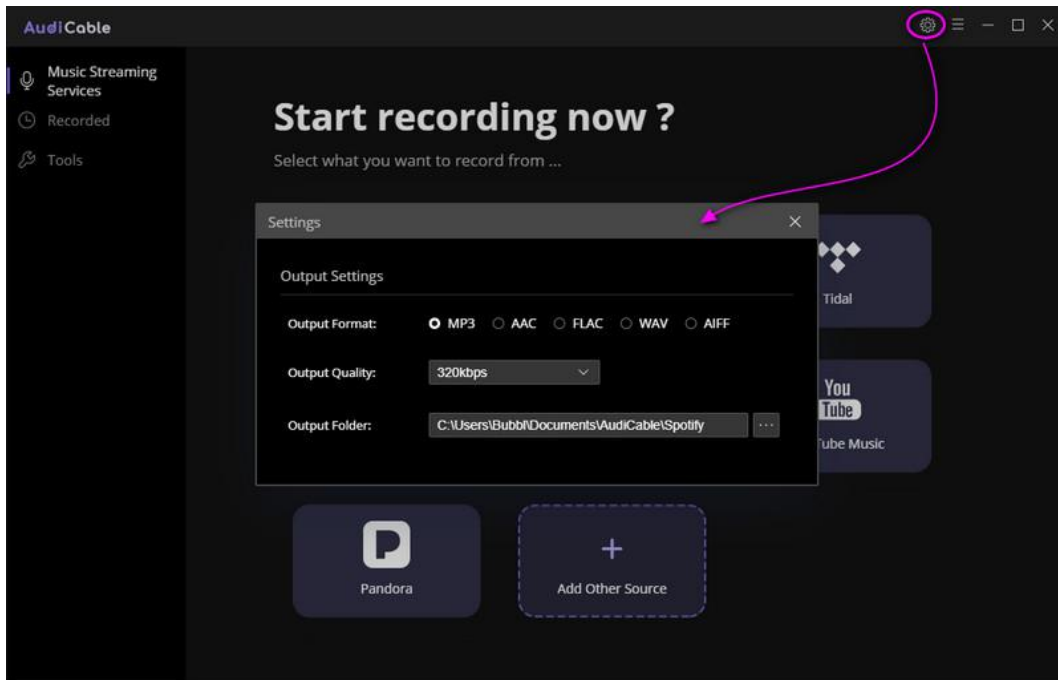

Step 2: You can directly click the "**key icon**" to open the registration window. Otherwise, go to the "**menu icon**"  and choose Register to open the registration window.

Step 3: Then copy and paste the registration Email and Code you received into the registration popup window.

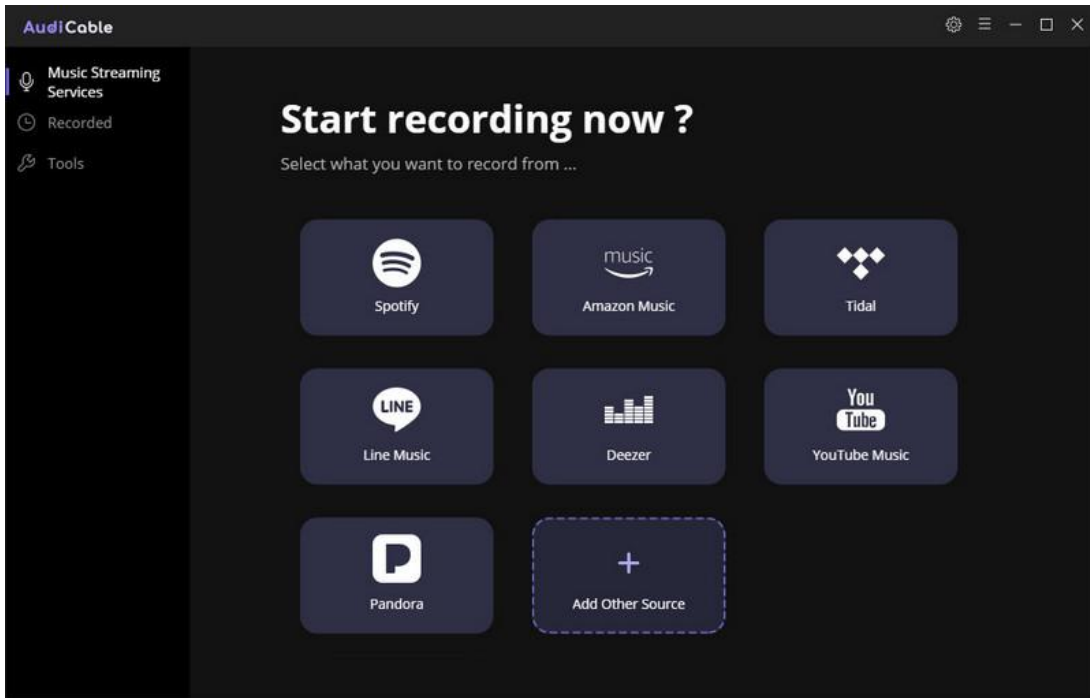

Customize Output Settings

Launch this all-in-one AudiCable Audio Recorder, then click on the "**setting icon**"  on the upper right corner to choose the **Output Format** (MP3 / AAC / FLAC / WAV / AIFF), the **Output Quality** (320kbps, 256kbps, 192kbps, 128kbps) and **Output Path**. For better organizing your music library, you can save the output audio files into organized folder like Artist, Album, Artist/Album, or Album/Artist.

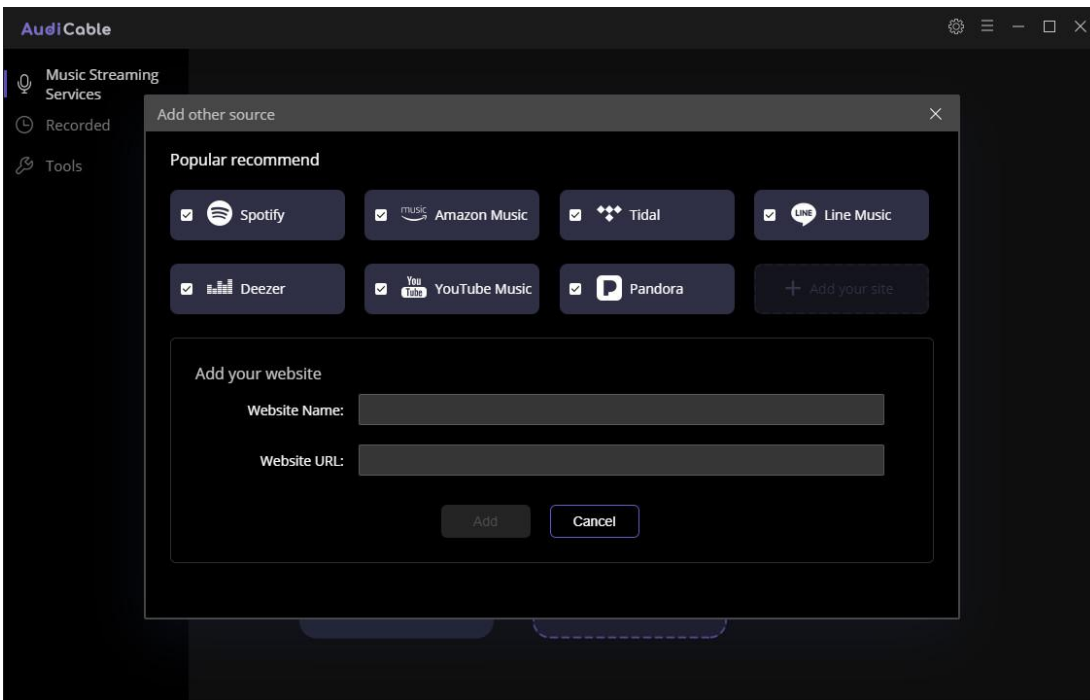

Start Desired Music App

Among main interface of AudiCable Recorder, Spotify, Amazon Music, Line Music, Deezer, Tidal, YouTube music, Pandora are available. Open your desired music app and sign in with your account.

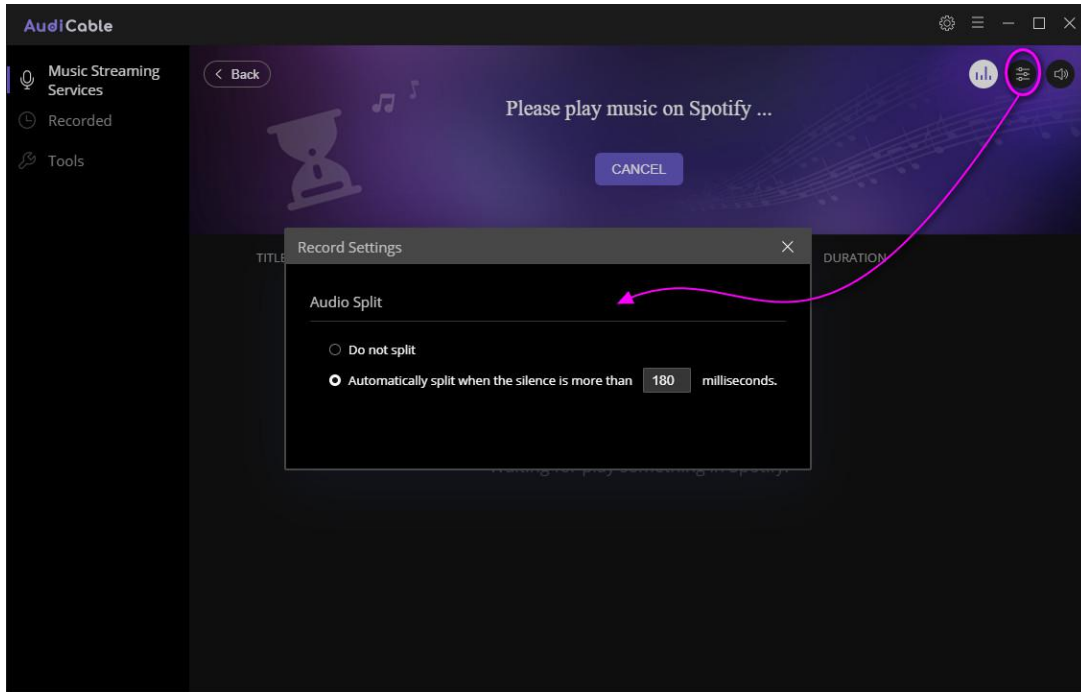

Add New Music Sites

If you could not find your favorite music app, just click **+Add** button to import a platform by yourself. Input the official website of the music service and enter its URL. Then you can start the music app on this customized AudiCable Audio Recorder.

Record Settings

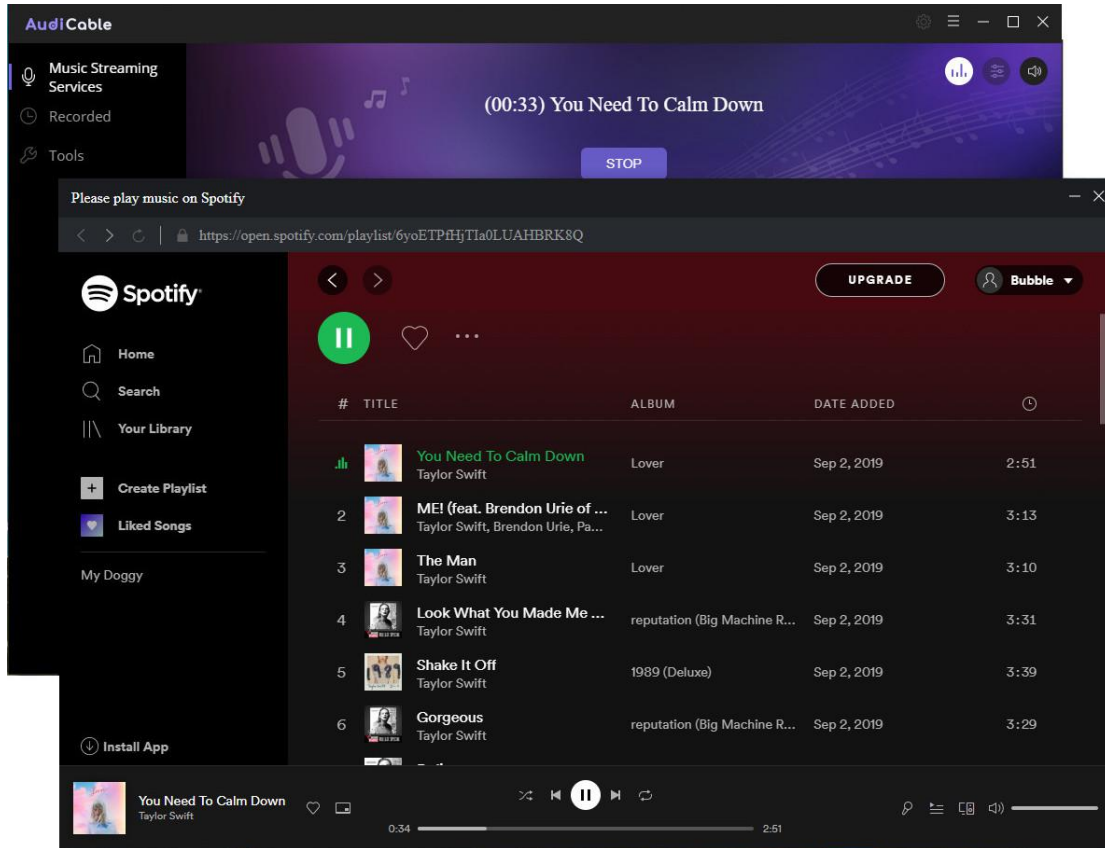

If you do not want to record the silent part of a song, you can stop recording, then under "**Music Streaming**" tab on AudiCable, go to the upper right corner, tap the "**record setting**"  icon on the middle. Then set "**Automatically split when the silence is more than (number) milliseconds**". Or just choose "**Do not split to make sure you will get a whole song**".

Start Recording Songs

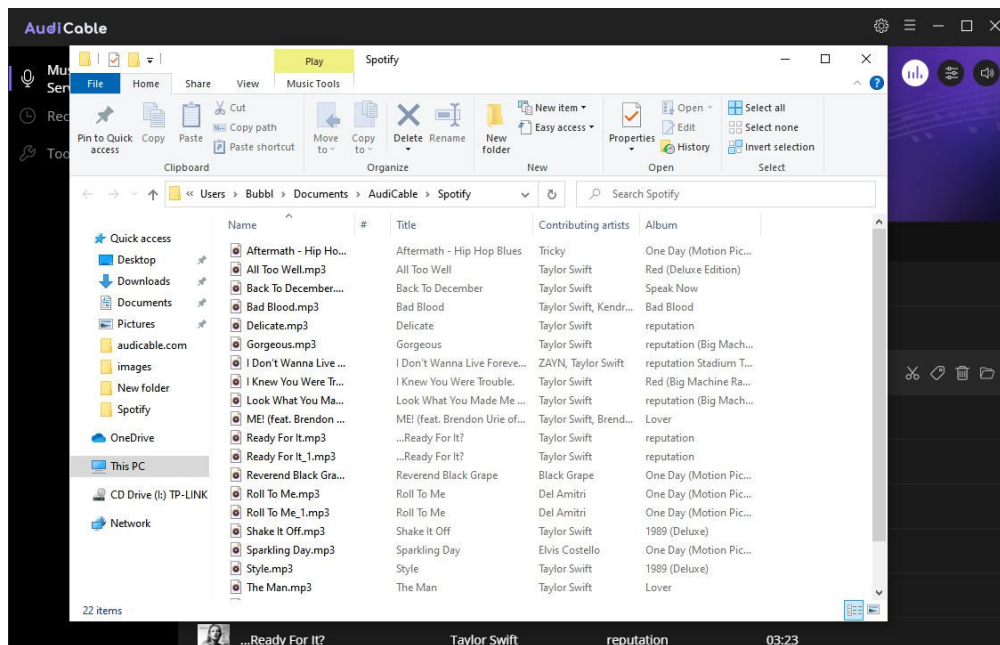

Browse for a favorite song or start playing the first song of a music playlist. AudiCable will start recording music automatically. Keep a stable network connection and tap "**Stop**" anytime you want to cancel.

Note: If you want to mute the song when recording, then under "**Music Streaming**" tab on AudiCable, go to the upper right corner, tap the "**sound**" icon  to **mute** . And you can stop recording, and listening to online music via AudiCable directly.

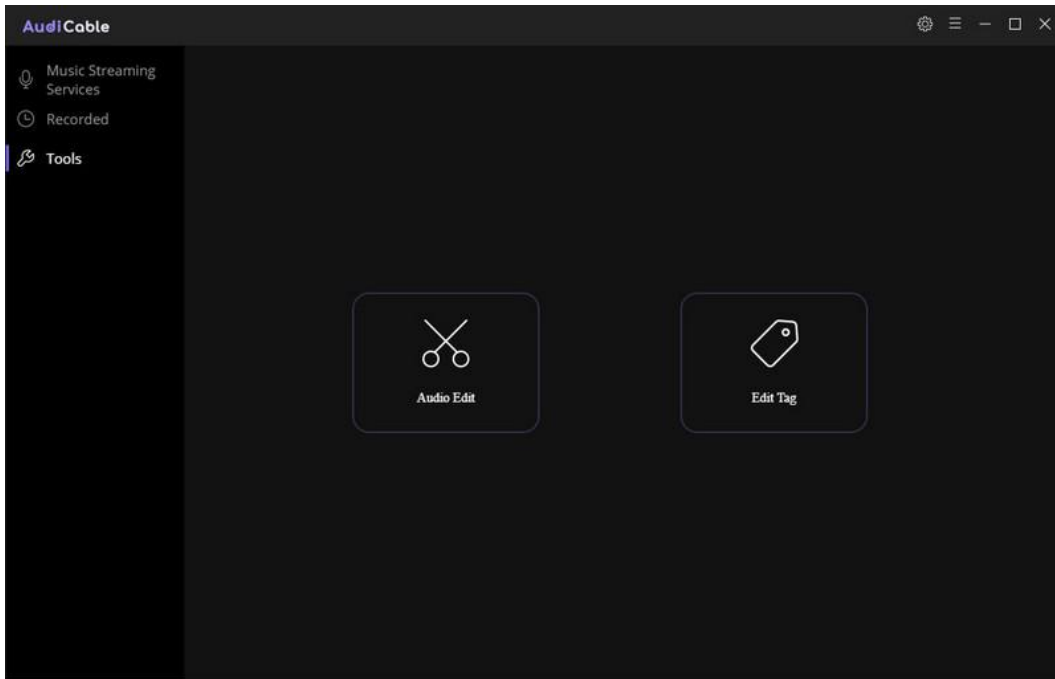

Check Downloaded Songs

After all songs are recorded, go to "Recorded" column, you can click "file icon"  behind any recorded song to open the output folder. Now, you can export the converted music to any device or disk.

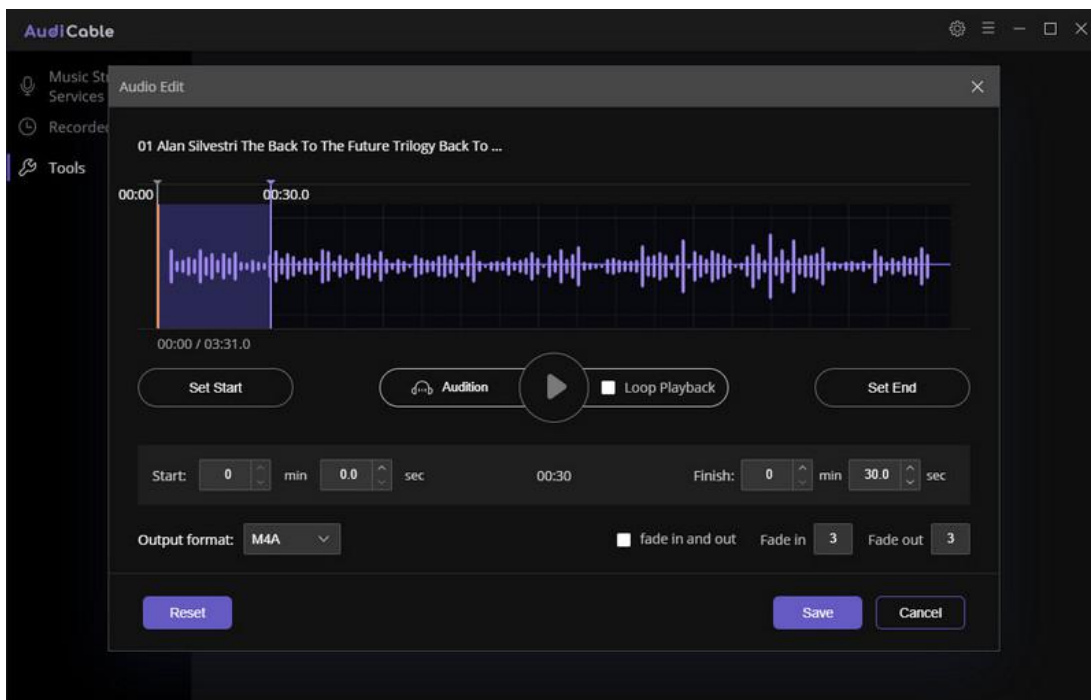

More Tools

More handy tools are provided by AudiCable Audio Recorder.

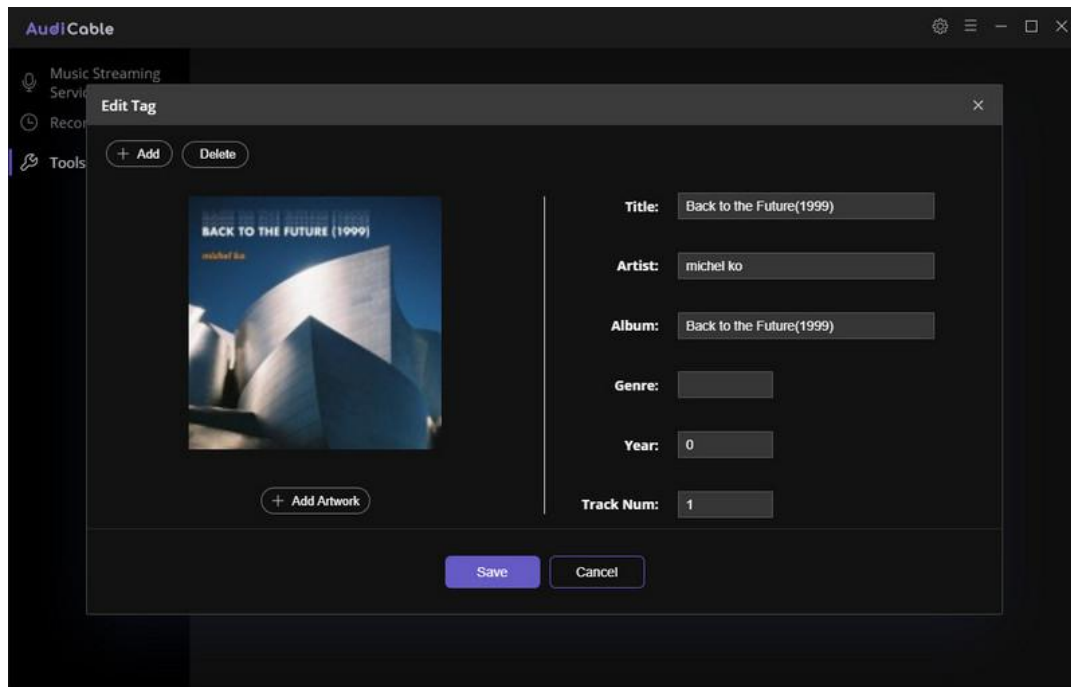

1. Audio Edit - Customize Audio File

To start editing audio on AudiCable, go to **"Tools > Audio Edit"**. Click **" +Add "** to import music from computer. Listen to the playing song and set its start and end. Set the output format (MP3, M4A, M4B, WAV, FLAC, AIFF, M4R) then click **"Save"** to export the customized audio file to computer.

2. Edit Tag - Edit ID3 Tag of Songs

To edit tag information of a song, go to "**Tools > Edit Tag**". Click "**+Add**" to import music from computer. AudiCable will load the meta data of the song automatically. Edit its cover, title, artist, album, genre, year and track number according to your needs. Click "**Save**" and close the window to apply all changes.

FAQ

- [Common issues](#)

Common Issues

Q1. What Does AudiCable Audio Recorder for Windows Do?

AudiCable is a smart Audio Recorder, which enables you to record songs from a wide variety of streaming platforms, like Spotify, Apple Music, Tidal, Amazon Music, Deezer, Line Music, YouTube Music, etc. straight from the soundcard.

Meanwhile, it can also keep Title, Artist, Album, Artwork and other track info to organize your music library. So far, Audicable can only support record Spotify songs with the metadata kept, and more streaming services are coming soon, please look forward to!

Q2. How to Use AudiCable Audio Recorder for Windows?

Download, install and launch AudiCable on your computer.

In the navigation, choose the Music Streaming you want to record from, like Spotify. The music Web Player will pop up, please use your account to log in. When you start playing the songs on Spotify, AudiCable will be ready for recording at the same time.

Q3. What can I do if the record process is failed?

1. Please make sure you are using the latest version of AudiCable. If not, please download the latest version from Download Center.
2. Please check whether there is an external audio device connected with your computer while recording. If so, please disconnect it (including Bluetooth). Then restart your computer and record again.

If it's failed again, please send all details of your problem to our support team at support@audicable.com, attached your Windows OS info as well as the log files of AudiCable. (Just find the menu button on the upper left corner and click on "Open Log File", and a window that contains the log file would pop up.) Please send all those log files to us.
